

PROSPECTIVE ENVS UNDERGRADUATE STUDENT INFORMATION

General CU information is available at: <http://www.colorado.edu/prospective>. There are tabs for freshmen, transfer, and international students. You may also sign up for campus visits through this website.

CURRICULUM

Please consult the environmental studies website for information about program requirements and other frequently asked questions: http://envs.colorado.edu/undergrad_program

The link at the bottom of that web page will take you to the Arts and Sciences core curriculum requirements. <http://www.colorado.edu/artssciences/students/undergraduate/core.html>

You will need to satisfy those A&S requirements before you graduate; some may be taken at community colleges. There is transfer information on the Arts and Sciences website that may be helpful: <http://www.colorado.edu/ArtsSciences/prospective/transfer06-07.html>

Most courses are offered during the day, but there are evening and online options available through Continuing Education: (online) <http://www.colorado.edu/cewww/> (evening) <http://conted.colorado.edu/>

It is possible to take courses through the ACCESS program administered by Continuing Education at either the undergraduate or graduate level even though you are not formally admitted to CU. <http://conted.colorado.edu/programs/access/>

INTERNSHIPS

Internships for credit are available through environmental studies. Details are on the website: http://envs.colorado.edu/undergrad_program/C32/Internships/

Career Services coordinates internships for pay: <http://careerservices.colorado.edu/public.cs?internships>

ADVISING

Decisions about how high school transcripts are evaluated or how courses transfer are made by the admissions office rather than each academic department. The ENVS undergraduate advisor deals only with the academic progress of current environmental studies majors. Your first contact with the academic advisor will be at orientation: <http://www.colorado.edu/orientation/>

QUESTIONS?

For general questions, please contact the ENVS office (gogreen@colorado.edu or 303.735.1043). A staff member is usually able to visit either in person or over the telephone. If you are planning a trip to campus, contact the ENVS office **in advance** to arrange an office visit and/or the opportunity to sit in on a class.
